

## Maths Curriculum Overview.

Our Values	INTENT		
<p>Honesty: We believe that honesty is the foundation for trust in our relationships. We are brave and admit when we have made a mistake. We are reliable and responsible for our own actions.</p>	<p>WHOLE CURRICULUM AIM</p>	<p>To develop and apply the knowledge, skills and understanding that we help the children to become successful learners, confident individuals and responsible citizens.</p>	<p>MATHEMATICS CURRICULUM</p> <p>At Frances Olive Anderson C of E Primary School, we want the children to see Mathematics as being relevant to their world and applicable to everyday life as well as being something that they will need as they move on through their school life and ultimately to the world of employment. To that end, a high-quality, inter-related and creative Maths experience should be one that develops the children’s ability to think mathematically and one which allows them to apply the tools to which they have been exposed in a variety of ways. Therefore, providing a sense of enjoyment and curiosity about the subject.</p> <p>We place a strong emphasis on teaching Mathematical skills and concepts in concrete and practical contexts, alongside teaching common misconceptions and key learning points to inform student questioning and aid rich verbal reasoning. Teachers should use models and practical activities which enable the children to use and apply skills, knowledge and understanding.</p>
<p>Courage: We are brave and take chances. We develop resilience to keep going even when things are hard. We face our fears, and we are not afraid to learn from our mistakes.</p>	<p>WHOLE CURRICULUM OBJECTIVES</p>	<p>To develop the child as a responsible and confident citizen who is equipped with the skills, knowledge, and attitude to be successful in our everchanging and diverse world.</p>	
<p>Friendship: We value our friendships and believe that together we can support one another to flourish. We do not judge we accept everyone for who they are.</p>		<p>To develop the child as an individual who embraces challenge and makes the most of every opportunity to learn.</p>	<p>MATHEMATICS CURRICULUM AIMS</p> <p>At Frances Olive Anderson C of E Primary School, we use the National Curriculum aims to create the intent for our Mathematics Curriculum.</p> <p>We aim to provide a high-quality mathematics education with a mastery approach so that all children:</p> <ul style="list-style-type: none"> <li>• become fluent in the fundamentals of mathematics;</li> <li>• reason mathematically;</li> <li>• can solve problems by applying their mathematics. (National Curriculum 2014)</li> </ul>
<p>Respect: We are respectful by treating others how we wish to be treated—we use our manners, we are thoughtful, kind and celebrate our similarities and differences.</p>		<p>To develop the child as a life-long learner who has a broad range of knowledge and skills which enables the child to succeed in life.</p>	
<p>Commitment to achieve: We believe we can achieve in</p>			

FRANCES OLIVE ANDERSON  
Church of England (Aided) School

'Being different, Belonging together'

<p>anything that we put our minds to. We always aim high, display a thirst for learning; to be the best we can be.</p>			<p>Our children are regularly exposed to increasingly complex problems, where they can make rich connections across mathematical ideas to develop fluency and mathematical reasoning; as well as being able to move fluently between representations of mathematical ideas.</p> <p>At Frances Olive Anderson C of E Primary School, teachers are able to create carefully planned sequences of lesson using the long and medium term planning and drawing on their content choices that make an impact on their classes with a more focused approach, to meet the needs of all pupils thinking of their year group objectives, academic abilities/achievements.</p>
--	--	--	---

## Mathematics Key Knowledge and Skills Overview IMPLEMENTATION

### Teaching of Mathematics

We use a range of objects, pictures, words, numbers and symbols. Using the mastery approach incorporates all of these to help children explore and demonstrate mathematical ideas, enrich their learning experience and deepen understanding. Together, these elements help cement knowledge so pupils truly understand what they've learnt. All pupils, when introduced to a key new concept, should have the opportunity to build competency in this topic by taking this approach. Pupils are encouraged to physically represent mathematical concepts. Objects and pictures are used to demonstrate and visualise abstract ideas, alongside numbers and symbols.

**Concrete** – children have the opportunity to use concrete objects and manipulatives to help them understand and explain what they are doing.

**Pictorial** – children then build on this concrete approach by using pictorial representations, which can then be used to reason and solve problems.

**Abstract** – With the foundations firmly laid, children can move to an abstract approach using numbers and key concepts with confidence.

We follow the White Rose Maths Calculation Policy for Addition, Subtraction, Multiplication and Division (see separate document).

**EYFS:** Mathematics is taught in adult led sessions. The provision begins with one adult led session weekly and is built throughout the year. The continuous provision for play based learning also provides the pupils mathematical opportunities.

**Years 1-6:** Mathematics is taught through a 15 minute Active Number session, followed by an hourly Maths lesson, at least 4 times per week.

See long and medium term plan for individual year groups.

'Being different, Belonging together'

	<p>During lessons, we aim to give pupils on the spot verbal feedback to allow children to act and move forward with their learning quickly. If a group of children require further support, pre-teaching sessions or rapid intervention are given to support these learners.</p> <p>All lessons have a clear learning objective which is shared with the children. The structure of a daily maths lesson will vary depending on the context of the lesson, learning styles of the children and the desired learning outcomes, to best suit the needs of the class and the individual lesson.</p> <p>The teaching of mathematics provides opportunities for: group work, guided work, paired work, whole class teaching and individual work, with many Kagan opportunities implemented throughout.</p>
Active Number	<p>Every Maths lesson begins with a 15 minute Active Number session. Active Number uses the principles of mnemonics, intended to assist the memory, to develop 'mastery', providing a deepened understanding of number and calculation using the four operations. It uses images, actions and verbal reasoning to develop learning. The session consists of five sections: counting, multiplication tables, mental gymathstics, reasoning and arithmetic. See Counting/times table progression (separate document) and Active Number progression (see handbook).</p>
Planning	<p>We have developed the current long term plan to support all staff members and colleagues to create a carefully planned sequences of lessons to meet the needs of all pupils thinking of their year group objectives, academic abilities/achievements. This also gives all teachers the ability to identify what has been taught in the previous year group to support scaffolded learning.</p> <p>Following the White Rose Maths Calculation Policy, to ensure methods are taught using concrete resources, pictorial/visual images and an abstract approach. This is developed from EYFS to year 6. We have also developed a progression for counting/times tables and vocabulary and to ensure all members of staff within school are supported when teaching any year group or subject area.</p> <p>Teachers are creating their own lessons using the sequences from the long term planning and drawing on their content choices that make of an impact on their classes with a more focused approach.</p> <p>Each year group has a set of skills/objectives expected to be covered each year and medium term planning includes the Ready to Progress expectations and NCETM materials.</p>
Assessment and Monitoring	<p>Years 1 – 6 undertake two reasoning papers and one arithmetic paper at the end of each term, shown on the Long Term plan. Teachers then analyse these papers and work with the Maths Coordinator to identify any gaps in class/individual learning and how these can be addressed.</p>

'Being different, Belonging together'

	<p>EYFS will continue to form their assessment through the use of Tapestry. These will be used by the maths subject leader and teachers to analyse support for teaching and learning in each classroom. Most of the EYFS provision for mathematics is based on the use of concrete and pictorial approaches and from autumn term 2 onwards the pupils will begin to record their learning in a maths journal. All achieved milestones for maths are recorded on Tapestry.</p> <p>In Ks1/Ks2 all pupils are able to access lessons that are play based and using concrete resources. At times, lessons may be evidenced on Seesaw by images. Recording of problem solving and abstract approaches are evidenced in their maths books. Marking from Year 2 upwards is a variety of teacher, self or peer marking. Learning by Questions is also used within classes as a tool to assess pre/post-knowledge of a topic or to support learning. Learning walks and student conversations are used as an indicator of student engagement in the lesson. This is cross-checked with monitoring of maths books, Seesaw and pupil interviews. Feedback is given promptly to teachers/teaching assistants and actions are set for the next monitoring date.</p>
Homework	<p>Children in Year 1-6 have access to Times Table Rockstars. Times Tables should be practised regularly at home in preparation for the Year 4 Multiplication check and continue to be consolidated after.</p> <p>Children will receive weekly Maths homework from their class teacher. The aim of homework is to consolidate and practise skills taught in class and parent/carer engagement is highly beneficial to the children's learning.</p>
Displays	<p>In each classroom, you would see a 'Maths Working Wall' display; they are a place to support current and future learning in maths. The working wall is purposeful, helpful, relevant and above all useful. STEM sentences are also displayed in classroom to encourage pupils to communicate and clarify mathematical conceptual ideas or generalisations.</p>
CPD	<p>CPD is important in Maths and all staff are encouraged to raise any issues or share their experiences they have within mathematics in order to ensure everyone is confident in what they teach. Good practice is always shared between staff and all CPD is used to inform teaching and learning across school. Maths Coordinator has provided specific training for teaching assistants to improve their knowledge and confidence where needed. The local Maths Hub and KYRA Teaching Alliance has been very beneficial in contributing to the Maths Coordinator's knowledge and teaching to then share with other staff.</p>
Cross-Curricular	<p>We aim to provide our pupils with a wide and creative curriculum by delivering cross-curricular links. Examples include: counting, weighing and measuring in DT, data handling in Science, timelines in History, shapes and patterns in Art, co-ordinates and scale in Geography. Where possible, we take Maths learning outdoors and in particular, in our school Nature Reserve. We also encourage the use of IT to enhance Maths learning.</p>

Mathematics Key Skills Progression IMPLEMENTATION							
	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<b>NUMBER AND PLACE VALUE</b>							
<b>Mathematical Vocabulary</b>	<p>Use a wider range of vocabulary Understand why questions such as “why do you think...?”</p> <p>Understand a question or instruction that has two parts, such as: “Get your coat and wait at the door”.</p> <p>Use talk to help work out problems and organise thinking and activities, and to explain how things work and why they might happen.</p> <p>Use talk to help work out problems and organise thinking and activities, and to explain how things work and why they might happen.</p> <p>Use new vocabulary in different contexts</p>	<p>To read and spell mathematical vocabulary, at a level consistent with their increasing word reading and spelling knowledge at year 1.</p>	<p>To read and spell mathematical vocabulary, at a level consistent with their increasing word reading and spelling knowledge at key stage 1.</p>	<p>To read and spell mathematical vocabulary correctly and confidently, using their growing word reading knowledge and their knowledge of spelling.</p>	<p>To read and spell mathematical vocabulary correctly and confidently, using their growing word reading knowledge and their knowledge of spelling.</p>	<p>To read, spell and pronounce mathematical vocabulary correctly.</p>	<p>To read, spell and pronounce mathematical vocabulary correctly.</p>

'Being different, Belonging together'

Counting	<p>Recite numbers past 5.</p> <p>Say one number for each item in order: 1,2,3,4,5.</p> <p>Know that the last number reached when counting a small set of objects tells you how many there are in total ('cardinal principle').</p> <p>Count objects, actions and sounds.</p> <p>Count beyond ten.</p> <p>Verbally count beyond 20, recognising the pattern of the counting system.</p>	<p>To count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number. To identify one more and one less than a given number.</p> <p>To count in multiples of twos, fives and tens from different multiples to develop their recognition of patterns in the number system, including varied and frequent practice through increasingly complex questions.</p> <p>To recognise and create repeating patterns with objects and with shapes.</p>	<p>To count in steps of 2, 3, and 5 from 0, and in tens from any number, forward and backward.</p>	<p><i>To continue to count in ones, tens and hundreds, so that pupils become fluent in the order and place value of numbers to 1000.</i></p> <p><i>To count from 0 in multiples of 4, 8, 50 and 100.</i></p>	<p><i>To count in tens and hundreds, and maintain fluency in other multiples through varied and frequent practice.</i></p> <p><i>To count in multiples of 6, 7, 9, 25 and 1000.</i></p> <p><i>To count backwards through zero to include negative numbers.</i></p> <p><i>To find 1000 more or less than a given number.</i></p>	<p>To count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000.</p> <p>To interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero.</p>	
----------	--	--	--	--	---	--	--

'Being different, Belonging together'

<p>Compare and order numbers</p>	<p>Compare quantities using language: 'more than', 'fewer than'.</p> <p>Begin to describe a sequence of events, real or fictional, using words such as 'first', 'then...'</p> <p>Compare numbers.</p> <p>Understand the 'one more than/one less than' relationship between consecutive numbers.</p> <p>Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity.</p>		<p>To compare and order numbers from 0 up to 100; use &lt;, &gt; and = signs.</p>	<p>To compare and order numbers up to 1000.</p>	<p>To order and compare numbers beyond 1000.</p>	<p>To order and compare numbers to at least 1 000 000 and determine the value of each digit.</p>	<p>To order and compare numbers up to 10 000 000 accurately and determine the value of each digit.</p>
<p>Understanding place value</p>	<p>Understand the 'one more than/one less than' relationship between consecutive numbers.</p> <p>Explore the composition of numbers to 10.</p> <p>Have a deep understanding of numbers to 10, including the composition of each number.</p>		<p>To recognise the place value of each digit in a two-digit number (tens, ones) to become fluent and apply their knowledge of numbers to reason with, discuss and solve problems. To begin to understand zero as a place holder.</p>	<p>To recognise the place value of each digit in a three-digit number (hundreds, tens, ones) and apply partitioning related to place value using varied and increasingly complex problems, building on work in year 2 (for example, <math>146 = 100 + 40</math> and <math>6</math>, <math>146 = 130 + 16</math>).</p>	<p>To recognise the place value of each digit in a four-digit number. To begin to extend their knowledge of the number system to include the decimal numbers and fractions that they have met so far.</p>	<p>To extend and apply their understanding of the number system to the decimal numbers and fractions that they have met so far.</p>	<p>To use negative numbers in context, and calculate intervals across zero.</p>

'Being different, Belonging together'

Rounding					To round any number to the nearest 10, 100 or 1000.  <i>To connect estimation and rounding numbers to the use of measuring instruments.</i>	To round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000.	To round any whole number to a required degree of accuracy.
Roman Numerals					To read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.	To read Roman numerals to 1000 (M) and recognise years written in Roman numerals.	
Solve problems	Solve real world mathematical problems with numbers up to 5.  Begin to describe a sequence of events, real or fictional, using words such as 'first', 'then...'	<i>To practise ordinal numbers and solve simple concrete problems.</i>	To use place value and number facts to solve <i>related</i> problems to <i>develop fluency</i> .	To solve number problems and practical problems involving these ideas.	To solve number and practical problems that involve all of the above and with increasingly large positive numbers.	To solve number problems and practical problems that involve all of the above.	To solve number and practical problems that involve all of the above.
<b>ADDITION AND SUBTRACTION</b>							

'Being different, Belonging together'

Mental calculations	<p>Develop fast recognition of up to 3 objects, without having to count them individually ('subitising').</p> <p>Know that the last number reached when counting a small set of objects tells you how many there are in total ('cardinal principle').</p> <p>Show 'finger numbers' up to 5.</p> <p>Subitise.</p> <p>Explore the composition of numbers to 10.</p> <p>Automatically recall number bonds 0-5 and some to 10.</p> <p>Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.</p> <p>Have a deep understanding of numbers to 10, including the composition of each number.</p> <p>Subitise (recognise quantities without counting) up to 5.</p>	<p>To add and subtract one-digit and two-digit numbers to 20, including zero.</p> <p>To realise the effect of adding or subtracting zero.</p>	<p>To extend the language of addition and subtraction to include sum and difference.</p> <p>To show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot.</p> <p>To add and subtract numbers using an efficient strategy, explaining their method verbally using concrete objects, pictorial representations, and mentally, including: a two-digit number and ones, a two-digit number and tens, two two-digit numbers, add three one-digit numbers.</p>	<p>To add and subtract numbers mentally, including: two-digit numbers, where the answers could exceed 100, a three-digit number and ones, a three-digit number and tens and a three-digit number and hundreds.</p>	<p>To continue to practise both mental methods and columnar addition and subtraction with increasingly large numbers to aid fluency.</p>	<p>To add and subtract numbers mentally with increasingly large numbers.</p>	<p>To perform mental calculations, including with mixed operations and large numbers.</p>
---------------------	--	---	---	--	--	--	---

'Being different, Belonging together'

Number bonds	<p>Develop fast recognition of up to 3 objects, without having to count them individually ('subitising').</p> <p>Show 'finger numbers' up to 5.</p> <p>Subitise.</p> <p>Explore the composition of numbers to 10.</p> <p>Automatically recall number bonds 0-5 and some to 10.</p> <p>Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.</p> <p>Have a deep understanding of numbers to 10, including the composition of each number.</p> <p>Subitise (recognise quantities without counting) up to 5.</p>	<p>To memorise, represent and use number bonds and related subtraction facts within 20.</p>	<p>To recall all number bonds to and within 10 and use these to reason with and calculate bonds to and within 20, recognising other associated additive relationships.</p> <p>To recall and use addition and subtraction facts to 20 to become fluent in deriving associative facts (e.g. <math>10 - 7 = 3</math>, <math>100 - 70 = 30</math>) and derive and use related facts up to 100.</p>				
--------------	--	---	--	--	--	--	--

'Being different, Belonging together'

Written calculations		To read, write and interpret mathematical statements involving addition (+), subtraction (−) and equals (=) signs.	<i>To begin to record addition and subtraction in columns to support place value and prepare for formal written methods with larger numbers.</i>	<i>To use the understanding of place value and partitioning to enable adding and subtracting numbers with up to three digits, using formal written methods of columnar addition and subtraction to become fluent.</i>	To add and subtract numbers with up to four digits using the formal written methods of columnar addition and subtraction where appropriate.	To add and subtract whole numbers with more than four digits, including using formal written methods of columnar addition and subtraction fluently.	
Inverse operation, estimating and checking answers	<p>Develop fast recognition of up to 3 objects, without having to count them individually ('subitising').</p> <p>Explore the composition of numbers to 10.</p>		To recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	To estimate the answer to a calculation and use inverse operations to check answers.	To estimate and use inverse operations to check answers to a calculation.	To use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy.	<i>To round answers to a specified degree of accuracy, for example, to the nearest 10, 20, 50 etc., but not to a specified number of significant figures.</i>
Order of operations							To use their knowledge of the order of operations to carry out calculations involving the four operations.

'Being different, Belonging together'

Solve problems	<p>Solve real world mathematical problems with numbers up to 5.</p> <p>Begin to describe a sequence of events, real or fictional, using words such as 'first', 'then...'</p> <p>Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed evenly.</p>	<p>To discuss and solve one-step problems (<i>in familiar practical contexts</i>) that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems. <i>Problems include the terms: put together, add, altogether, total, take away, distance between, difference between, more than and less than, so that pupils develop the concept of addition and subtraction and are able to use these operations flexibly.</i></p>	<p>To solve problems with addition and subtraction: using concrete objects and pictorial representations, including those involving numbers, quantities and measures applying their increasing knowledge of mental and written methods.</p>				
	<b>MULTIPLICATION AND DIVISION</b>						

'Being different, Belonging together'

Mental calculations	<p>Explore the composition of numbers to 10.</p> <p>Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed evenly.</p>		<p><i>To begin to use other multiplication tables and recall multiplication facts, including using related division facts to perform written and mental calculations.</i></p> <p><i>To begin to relate multiplication and division facts to fractions and measures (e.g., <math>40 \div 2 = 20</math>, 20 is a half of 40).</i></p> <p>To show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot, <i>to develop multiplicative reasoning.</i></p>	<p>To write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using <i>efficient mental methods, for example, using commutativity and associativity</i>, and progressing to formal <i>reliable</i> written methods of <i>short multiplication and division.</i></p>	<p><i>To combine their knowledge of number facts and rules of arithmetic to solve mental and written calculations, e.g. <math>2 \times 6 \times 5 = 10 \times 6 = 60</math>.</i></p> <p><i>To practise mental methods and extend this to three-digit numbers to derive associative facts, (e.g. <math>600 \div 3 = 200</math> can be derived from <math>2 \times 3 = 6</math>).</i></p> <p>To recognise and use factor pairs and commutativity in mental calculations.</p> <p>To use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers.</p>	<p>To multiply and divide numbers mentally drawing upon known facts.</p>	<p>To perform mental calculations, including with mixed operations and large numbers.</p>
---------------------	--	--	--	--	--	--	---

'Being different, Belonging together'

Multiplication and Division Facts	<p>Explore the composition of numbers to 10.</p> <p>Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed evenly.</p> <p>Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.</p>	<p>To make connections between arrays, number patterns, and counting in twos, fives and tens.</p> <p>Through grouping and sharing small quantities, pupils begin to understand: multiplication and division; doubling numbers and quantities; and finding simple fractions of objects, numbers and quantities.</p>	<p>To use a variety of language to describe multiplication and division.</p> <p>To count from 0 in multiples of 4, 8, 50 and 100.</p> <p>To recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers and use them to solve simple problems, demonstrating an understanding of commutativity as necessary.</p> <p>To connect the 10 multiplication table to place value, and the 5 multiplication table to the divisions on the clock face.</p>	<p>To recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables when they are calculating mathematical statements in order to improve fluency.</p> <p>To connect the 2, 4 and 8 multiplication tables through doubling.</p>	<p>To recall multiplication and division facts for multiplication tables up to <math>12 \times 12</math> to aid fluency.</p> <p>To write statements about the equality of expressions (for example, use the distributive law <math>39 \times 7 = 30 \times 7 + 9 \times 7</math> and associative law <math>(2 \times 3) \times 4 = 2 \times (3 \times 4)</math>).</p>	<p>To apply all the multiplication tables and related division facts frequently, commit them to memory and use them confidently to make larger calculations.</p>	<p>To continue to use all the multiplication tables to calculate mathematical statements in order to maintain their fluency.</p>
-----------------------------------	--	--	--	---	---	--	--

'Being different, Belonging together'

Written calculations			<p>To calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (<math>\times</math>), division (<math>\div</math>) and equals (=) signs. <i>To begin to use other multiplication tables and recall multiplication facts, including using related division facts to perform written and mental calculations.</i></p>	<p>To write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using <i>efficient mental methods, for example, using commutativity and associativity</i>, and progressing to formal <i>reliable</i> written methods <i>of short multiplication and division. (included in mental calculation section)</i></p>	<p>To multiply two-digit and three-digit numbers by a one-digit number using the formal written layout of <i>short multiplication with exact answers.</i></p> <p><i>To become fluent in the formal written method of short division with exact answers.</i></p>	<p>To multiply numbers up to four digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers fluently.</p> <p>To divide numbers up to four digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context fluently.</p> <p>To multiply and divide whole numbers and those involving decimals by 10, 100 and 1000.</p>	<p>To multiply multi-digit numbers up to four digits by a two-digit whole number using the formal written method of long multiplication.</p> <p>To divide numbers up to four digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context.</p> <p>To divide numbers up to four digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context. Perform mental calculations, including with mixed operations and large numbers.</p>
----------------------	--	--	---	---	---	---	---

'Being different, Belonging together'

Properties of numbers	Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed evenly.					<p><i>To use and understand the terms factor, multiple and prime, square and cube numbers and use them to construct equivalence statements.</i></p> <p>To identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers.</p> <p>To know and use the vocabulary of prime numbers, prime factors and composite (non-prime) numbers. To establish whether a number up to 100 is prime and recall prime numbers up to 19.</p>	To identify common factors, common multiples and prime numbers.
-----------------------	--	--	--	--	--	---	---

FRANCES OLIVE ANDERSON  
Church of England (Aided) School

'Being different, Belonging together'

							To recognise and use square numbers and cube numbers, and the notation for squared ( $^2$ ) and cubed ( $^3$ ).	
Order of operations								To use their knowledge of the order of operations to carry out calculations involving the four operations.

'Being different, Belonging together'

Solve problems	<p>Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed evenly.</p>	<p>To solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.</p>	<p>To solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts.</p>	<p>To solve <i>simple</i> problems in contexts, <i>deciding which of the four operations to use and why</i>. These include missing number problems, involving multiplication and division, including <i>measuring</i> and positive integer scaling problems and correspondence problems in which <math>n</math> objects are connected to <math>m</math> objects.</p>	<p>To solve <i>two-step</i> problems in contexts involving multiplying and adding, including using the distributive law to multiply two-digit numbers by one digit, integer scaling problems and harder correspondence problems, such as <math>n</math> objects are connected to <math>m</math> objects.</p>	<p>To solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes.</p> <p>To solve problems, <i>including in missing number problems</i>, involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign (<i>to indicate equivalence</i>).</p> <p>To solve problems involving multiplication and division, including scaling by simple fractions and</p>	<p>To solve problems involving addition, subtraction, multiplication and division.</p> <p>To use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.</p>

'Being different, Belonging together'

						problems involving simple rates.	
<b>FRACTIONS, DECIMALS AND PERCENTAGES</b>							
Counting			<p>To count in fractions up to 10, starting from any number and using the <math>\frac{11}{22}</math> and <math>\frac{2}{4}</math> equivalence on the number line.</p>	<p>To count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by ten.</p>	<p>To count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten.</p>	<p>To extend counting from year 4, using decimals and fractions including bridging zero, for example on a number line. To continue to practise counting forwards and backwards in simple fractions.</p>	

'Being different, Belonging together'

Recognising, finding, and naming fractions	<p>To recognise, find and name a half as one of two equal parts of an object, shape or quantity by solving problems.</p> <p>To recognise, find and name a quarter as one of four equal parts of an object, shape or quantity by solving problems.</p> <p>To connect halves and quarters to the equal sharing and grouping of sets of objects and to measures, as well as recognising and combining halves and quarters as parts of a whole.</p>	<p>To recognise, find, name, identify and write fractions <math>\frac{11}{22}</math>, <math>\frac{11}{33}</math>, <math>\frac{11}{44}</math>, <math>\frac{22}{44}</math> and <math>\frac{33}{44}</math> of a length, number, shape, set of objects or quantity and know that all parts must be equal parts of the whole.</p> <p>To connect unit fractions to equal sharing and grouping, to numbers when they can be calculated, and to measures, finding fractions of lengths, quantities, sets of objects or shapes.</p> <p>They meet <math>\frac{11}{22}</math> as the first example of a non-unit fraction.</p>	<p>To understand the relation between unit fractions as operators (fractions of), and division by integers.</p> <p>To recognise, understand and use fractions as numbers: unit fractions and non-unit fractions with small denominators as numbers on the number line (going beyond 0 -1 and relating this to measure), and deduce relations between them, such as size and equivalence.</p> <p>To recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators.</p>	<p>To make connections between fractions of a length, of a shape and as a representation of one whole or set of quantities.</p> <p>To know that decimals and fractions are different ways of expressing numbers and proportions.</p> <p>To understand the relation between non-unit fractions and multiplication and division of quantities, with particular emphasis on tenths and hundredths.</p>	<p>To identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths.</p>
--	---	---	---	---	---

'Being different, Belonging together'

Comparing and ordering fractions				To compare and order unit fractions, and fractions with the same denominators.		To compare and order fractions whose denominators are all multiples of the same number.	To compare and order fractions, including fractions $> 1$ .
Adding and subtracting fractions				To add and subtract fractions with the same denominator within one whole <i>through a variety of increasingly complex problems to improve fluency.</i>	To add and subtract fractions with the same denominator <i>to become fluent through a variety of increasingly complex problems beyond one whole.</i>	To add and subtract fractions with the same denominator and denominators that are multiples of the same number <i>to become fluent through a variety of increasingly complex problems.</i>  To recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements $> 1$ as a mixed number.	To add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions <i>starting with fractions where the denominator of one fraction is a multiple of the other and progress to varied and increasingly complex problems.</i>

'Being different, Belonging together'

Multiplying and dividing fractions						<p><i>To continue to develop their understanding of fractions as numbers, measures and operators by finding fractions of numbers and quantities.</i></p> <p>To multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams.</p>	<p>To multiply simple pairs of proper fractions, writing the answer in its simplest form <i>using a variety of images to support their understanding of multiplication with fractions.</i></p> <p>To divide proper fractions by whole numbers.</p>
------------------------------------	--	--	--	--	--	---	--

'Being different, Belonging together'

Equivalence			<p>To write simple fractions for <math>\frac{11}{22}</math> of 6 = 3 and recognise the equivalence <math>\frac{2}{4}</math> and <math>\frac{11}{22}</math>.</p>	<p>To recognise and show, using diagrams, equivalent fractions with small denominators.</p>	<p>To use factors and multiples to recognise equivalent fractions and simplify where appropriate.</p> <p>To recognise and show, using diagrams, families of common equivalent fractions.</p> <p>To recognise and write decimal equivalents of any number of tenths or hundredths.</p> <p>To recognise and write decimal equivalents to <math>\frac{11}{22}</math>, <math>\frac{33}{44}</math>.</p>	<p>To read and write decimal numbers as fractions.</p> <p>To recognise and use thousandths and relate them to tenths, hundredths, decimal equivalents <i>and measures</i>.</p> <p>To recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal.</p>	<p>To recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.</p> <p>To use common factors to simplify fractions; use common multiples to express fractions in the same denomination.</p>
-------------	--	--	---	---	--	---	--

'Being different, Belonging together'

Comparing and ordering decimals					<p>To learn decimal notation and the language associated with it, including in the context of measurements.</p> <p>To represent numbers with one or two decimal places in several ways, such as on number lines.</p> <p>To compare numbers, amounts and quantities with the same number of decimal places up to two decimal places.</p>	<p>To read, <i>say</i>, write, order and compare numbers with up to three decimal places.</p>	<p>To identify the value of each digit in numbers given to three decimal places.</p>
Rounding decimals					<p>To round decimals with one decimal place to the nearest whole number.</p>	<p>To round decimals with two decimal places to the nearest whole number and to one decimal place.</p>	

'Being different, Belonging together'

Adding and subtracting decimals						<p><i>To mentally add and subtract tenths, and one-digit whole numbers and tenths.</i></p> <p><i>To practise adding and subtracting decimals, including a mix of whole numbers and decimals, decimals with different numbers of decimal places, and complements of 1.</i></p>	
---------------------------------	--	--	--	--	--	---	--

'Being different, Belonging together'

Multiplying and dividing decimals					<p>To find the effect of dividing a one or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths.</p>	<p>To multiply and divide numbers by 10, 100 and 1000 giving answers up to three decimal places.</p> <p>To associate a fraction with division and calculate decimal fraction equivalents for a simple fraction.</p> <p>To multiply one-digit numbers with up to two decimal places by whole numbers <i>in practical contexts, such as measures and money.</i></p> <p><i>To multiply and divide numbers with up to two decimal places by one-digit and two-digit whole numbers in practical contexts involving measures and money.</i></p> <p>To use written division methods in cases where the answer has up to two decimal places.</p> <p><i>To recognise division calculations as the inverse of multiplication.</i></p>
-----------------------------------	--	--	--	--	--	---

'Being different, Belonging together'

Solve problems				<p>To solve problems that involve all of the above.</p>	<p>To solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number.</p> <p>To solve simple measure and money problems involving fractions and decimals to two decimal places.</p>	<p>To solve problems involving numbers up to three decimal places.</p> <p>To make connections between percentages, fractions and decimals and relate this to finding 'fractions of' to solve problems which require knowing percentage and decimal equivalents <math>\frac{11}{22}</math>, <math>\frac{11}{44}</math>, <math>\frac{11}{55}</math>, <math>\frac{22}{44}</math> of <math>\frac{22}{55}</math>, <math>\frac{44}{55}</math>, <math>\frac{55}{55}</math> and those fractions with a denominator of a multiple of 10 or 25.</p>	<p>To solve problems which require answers to be rounded to specified degrees of accuracy and checking the reasonableness of their answers.</p>
	<b>ALGEBRA</b>						

'Being different, Belonging together'

Algebra							<p>To introduce the language of algebra as a means for solving a variety of problems.</p> <p>To introduce the use of symbols and letters to represent variables and unknowns in mathematical familiar situations, such as: missing numbers, lengths, coordinates and angles.</p> <p>To use simple formulae.</p> <p>To generate and describe linear number sequences. To express missing number problems algebraically.</p> <p>To find pairs of numbers that satisfy an equation with two unknowns.</p> <p>To enumerate possibilities of combinations of two <b>variables</b>.</p>
	<b>MEASUREMENT</b>						

'Being different, Belonging together'

Describe, measure, compare and solve	<p>Make comparisons between objects relating to size, length, weight and capacity.</p> <p>Compare length, weight and capacity.</p>	<p>To compare, describe and solve practical problems for lengths and heights, mass/weight, capacity and volume, time.</p> <p>To measure and begin to record the following: lengths and heights, mass/weight, capacity and volume, time.</p> <p><i>To move from using and comparing different types of quantities and measures using non-standard units, including discrete (for example, counting) and continuous (for example, liquid) measurement, to using manageable common standard units using measuring</i></p>	<p>To choose and use appropriate standard units with increasing accuracy using their knowledge of the number system to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels.</p> <p><i>To use the appropriate language and record using standard abbreviations.</i></p> <p>To compare and order lengths, mass, volume/capacity and record the</p>	<p>To measure using the appropriate tools and units, compare (including simple scaling by integers) add and subtract using mixed units: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml).</p>	<p>To estimate, compare and calculate different measures, including money in pounds and pence.</p>	<p>To use all four operations to solve problems involving measure using decimal notation, including scaling and conversions.</p> <p>To solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate.</p>	<p><i>To use a number line, to add and subtract positive and negative integers for measures such as temperature.</i></p>

'Being different, Belonging together'

		<i>tools, such as a ruler, weighing scales and containers.</i>	<p>results using <math>&gt;</math>, <math>&lt;</math> and <math>=</math>.</p> <p><i>To compare measures including simple multiples such as 'half as high'; 'twice as wide'.</i></p>				
Converting units of measure					<p>To use multiplication to convert from larger to smaller units.</p> <p>To convert between different units of measure and build on their understanding of place value and decimal notation to record metric measures, including money.</p>	<p>To use the knowledge of place value and multiplication and division to convert between standard units.</p> <p>To convert between different units of metric measure.</p> <p>To understand and use approximate equivalences between metric units and common imperial units.</p>	<p>To use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places.</p> <p>To convert between miles and kilometres.</p> <p>To know approximate conversions to tell if an answer is sensible.</p>

'Being different, Belonging together'

Telling time	<p>Begin to describe a sequence of events, real or fictional, using words, such as 'first', 'then...'</p>	<p>To sequence events in chronological order using language.</p> <p>To recognise and use language relating to dates, including days of the week, weeks, months and years.</p> <p>To tell the time to the hour and half past the hour and draw the hands on a clock face to show these times.</p>	<p>To read, tell and write the time to five minutes, including quarter past/to the hour/half hour and draw the hands on a clock face to show these times.</p> <p>To become fluent in telling the time on analogue clocks and recording it.</p> <p>To know the number of minutes in an hour and the number of hours in a day.</p> <p>To compare and sequence intervals of time.</p>	<p>To tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks.</p> <p>To begin to use digital 12-hour clocks and record their times in preparation for using digital 24-hour clocks in year 4.</p> <p>To estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours.</p> <p>To use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight.</p>	<p>To read, write and convert time between analogue and digital 12- and 24-hour clocks.</p> <p>To solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days.</p>	<p>To solve problems involving converting between units of time.</p>	
--------------	---	--	--	--	--	--	--

FRANCES OLIVE ANDERSON  
Church of England (Aided) School

'Being different, Belonging together'

				<p>To know the number of seconds in a minute and the number of days in each month, year and leap year.</p> <p>To compare durations of events.</p>			
--	--	--	--	---	--	--	--

Perimeter, area and volume				<p>To measure the perimeter of simple 2D shapes.</p>	<p>To measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres.</p> <p>To know perimeter can be expressed algebraically as <math>2(a + b)</math> where <math>a</math> and <math>b</math> are the dimensions in the same unit.</p> <p>To find the area of rectilinear shapes by counting squares.</p> <p>To relate area to arrays and multiplication.</p>	<p>To measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres including using the relations of perimeter. Note: Missing measures questions can be expressed algebraically.</p> <p>To calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres (<math>\text{cm}^2</math>) and square metres (<math>\text{m}^2</math>), use the area of rectangles to find unknown lengths and estimate the area of irregular shapes. Note: Missing measures questions can be expressed algebraically.</p>	<p>To recognise that shapes with the same areas can have different perimeters and vice versa.</p> <p>To recognise when it is possible to use formulae for area and volume of shapes.</p> <p>To relate the area of rectangles to parallelograms and triangles and calculate their areas, understanding and using the formulae (in words or symbols) to do this.</p> <p>To calculate the area of parallelograms and triangles.</p> <p>To calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (<math>\text{cm}^3</math>) and cubic metres (<math>\text{m}^3</math>), and extending to other units (for example, <math>\text{mm}^3</math> and <math>\text{km}^3</math>).</p>
----------------------------	--	--	--	--	---	--	--

'Being different, Belonging together'

							To calculate the area from scale drawings using given measurements.  To estimate volume.	
PROPERTIES OF SHAPES								

'Being different, Belonging together'

<p>Recognising 2D and 3D shapes and their properties</p>	<p>Talk about and explore 2D and 3D shapes (for example, circles, rectangles, triangles and cuboids) using informal and mathematical language: 'sides', 'corners'; 'straight', 'flat', 'round'.</p> <p>Select, rotate and manipulate shapes in order to develop spatial reasoning skills</p>	<p>To recognise, handle and name common 2D and 3D shapes in different orientations/sizes and relate everyday objects fluently.</p> <p>To recognise that rectangles, triangles, cuboids and pyramids are not always similar to each other.</p>	<p>Pupils read and write names for shapes that are appropriate for their word reading and spelling.</p> <p>To handle, identify and describe the properties of 2D shapes, including the number of sides and line symmetry in a vertical line.</p> <p>To handle, identify and describe the properties of 3D shapes, including the number of edges, vertices and faces.</p> <p>To identify 2D shapes on the surface of 3D shapes.</p>	<p>To describe the properties of 2D and 3D shapes using accurate language.</p> <p>To extend knowledge of the properties of shapes is extended at this stage to symmetrical and non-symmetrical polygon and polyhedron.</p> <p>To recognise 3D shapes in different orientations and describe them.</p>	<p>To identify lines of symmetry in 2D shapes presented in different orientations.</p> <p>To recognise line symmetry in a variety of diagrams, including where the line of symmetry does not dissect the original shape.</p>	<p>To identify 3D shapes, including cubes and other cuboids, from 2D representations.</p>	<p>To illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius.</p> <p>To express algebraically the relationship between angles and lengths.</p>
--	--	---	--	---	--	---	---

'Being different, Belonging together'

Compare and classify shapes	<p>Talk about and explore 2D and 3D shapes (for example, circles, rectangles, triangles and cuboids) using informal and mathematical language: 'sides', 'corners'; 'straight', 'flat', 'round'.</p> <p>Compose and decompose shapes so that children recognise a shape can have other shapes within it, just as numbers can.</p>		<p>To identify, compare and sort common 2D and 3D shapes and everyday objects on the basis of their properties and use vocabulary precisely.</p>		<p>To compare lengths and angles to decide if a polygon is regular or irregular.</p> <p>To compare and classify geometric shapes, including different quadrilaterals and triangles, based on their properties and sizes.</p>	<p>To distinguish between regular and irregular polygons based on reasoning about equal sides and angles.</p>	<p>To compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons using known measurements.</p>
-----------------------------	--	--	--	--	--	---	--

'Being different, Belonging together'

<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Drawing 2D shapes and constructing 3D shapes</p>	<p>Select shapes appropriately: flat surfaces for building, a triangular prism for a roof etc.</p> <p>Combine shapes to make new ones - an arch, a bigger triangle etc.</p> <p>Select, rotate and manipulate shapes in order to develop spatial reasoning skills.</p> <p>Compose and decompose shapes so that children recognise a shape can have other shapes within it, just as numbers can.</p>		<p><i>Pupils draw lines and shapes using a straight edge.</i></p>	<p>To connect decimals and rounding to drawing and measuring straight lines in centimetres, in a variety of contexts.</p> <p>To identify horizontal and vertical lines and pairs of perpendicular and parallel lines.</p> <p>To draw 2D shapes and make 3D shapes using modelling materials.</p>	<p>To draw with increasing accuracy and develop mathematical reasoning to analyse shapes and their properties and confidently describe the relationships between them.</p> <p>To complete a simple symmetric figure with respect to a specific line of symmetry.</p>	<p>To become accurate in drawing lines with a ruler to the nearest millimetre, and measuring with a protractor.</p> <p>To use conventional markings for parallel lines and right angles</p>	<p>To draw 2D shapes and nets accurately using given dimensions and angles using measuring tools, conventional markings and labels for lines and angles.</p> <p>To recognise, describe and build simple 3D shapes, including making nets.</p>
---	--	--	---	--	--	---	---

'Being different, Belonging together'

Angles				<p>To recognise angles as a property of shape or a description of a turn.</p> <p>To identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn</p> <p>To identify whether angles are greater than or less than a right angle.</p>	<p>To identify acute and obtuse angles and compare and order angles up to two right angles by size in preparation for using a protractor.</p>	<p>To know angles are measured in degrees; estimate and compare acute, obtuse and reflex angles. To draw given angles, and measure them in degrees.</p> <p>To identify: angles at a point and one whole turn (total <math>360^\circ</math>), angles at a point on a straight line and <math>\frac{1}{2}</math> a turn (total <math>180^\circ</math>) and other multiples of <math>90^\circ</math>.</p> <p><i>To use the term diagonal and make conjectures about the angles formed between sides, and between diagonals and parallel sides.</i></p> <p>To use the properties of rectangles to deduce related facts and find missing lengths and angles <i>by using angle sum facts and other properties to</i></p>	<p>To recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles.</p>
--------	--	--	--	--	---	--	---

FRANCES OLIVE ANDERSON  
Church of England (Aided) School

'Being different, Belonging together'

						<i>make deductions about missing angles and relate these to missing number problems.</i>	
<b>POSITION AND DIRECTION</b>							

'Being different, Belonging together'

Position, direction and movement	<p>Understand position through words alone – for example, “The bag is under the table,” – with no pointing.</p> <p>Describe a familiar route.</p> <p>Discuss routes and locations, using words like ‘in front of’ and ‘behind’.</p> <p>Draw information from a simple map.</p>	<p>To describe position, direction and movement, including whole, half, quarter and three-quarter turns <i>in both directions and connect clockwise with the movement on a clock face.</i></p> <p><i>To use the language of position, direction and motion, including: left and right, top, middle and bottom, on top of, in front of, above, between, around, near, close and far, up and down, forwards and backwards, inside and outside.</i></p>	<p>To use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anticlockwise).</p>		<p>To describe positions on a 2D grid as coordinates in the first quadrant.</p> <p><i>To draw a pair of axes in one quadrant, with equal scales and integer labels.</i></p> <p><i>To read, write and use pairs of coordinates, including using coordinate plotting ICT tools.</i></p> <p>To plot specified points and draw sides to complete a given polygon.</p> <p>To describe movements between positions as translations of a given unit to the left/right and up/down.</p>	<p>To identify, describe and represent the position of a shape following a reflection (<i>in lines that are parallel to the axes</i>) or translation, using the appropriate language, and know that the shape has not changed.</p>	<p><i>To draw and label a pair of axes in all four quadrants with equal scaling.</i> To describe positions on the full coordinate grid (all four quadrants).</p> <p>To draw and label simple shapes – rectangles (including squares), parallelograms and rhombuses, specified by coordinates in the four quadrants, predicting missing coordinates using the properties of shapes.</p> <p>To translate simple shapes where coordinates may be expressed algebraically on the coordinate plane and reflect them in the axes.</p>
----------------------------------	--	--	---	--	---	--	---

'Being different, Belonging together'

Patterns	<p>Talk about and identify the patterns around them. For example: stripes on clothes, designs on rugs and wallpaper. Use informal language like 'pointy', 'spotty', 'blobs' etc.</p> <p>Extend and create ABAB patterns – stick, leaf, stick, leaf.</p> <p>Notice and correct an error in a repeating pattern.</p> <p>Continue, copy and create repeating patterns.</p>		<p>To order and arrange combinations of mathematical objects and shapes, including those in different orientations, in patterns and sequences.</p>				
	<b>STATISTICS</b>						

'Being different, Belonging together'

Record, present and interpret data			<p><i>To record, interpret, collate, organise and compare information.</i></p> <p>To interpret and construct simple pictograms, tally charts, block diagrams and simple tables (e.g. many-to-one correspondence in pictograms with simple ratios 2, 5, 10 scales).</p> <p>To ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity.</p> <p>To ask and answer questions about totalling and comparing categorical data.</p>	<p>To interpret and present data using bar charts, pictograms and tables and use simple scales with increasing accuracy.</p>	<p><i>To understand and use a greater range of scales in data representations.</i></p> <p>To interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs.</p>	<p><i>To begin to decide which representations of data are most appropriate and why.</i></p> <p><i>To connect coordinates and scales to the interpretation of time graphs.</i></p> <p>To complete, read and interpret information in tables, including timetables.</p>	<p><i>To connect conversion from kilometres to miles in measurement to its graphical representation.</i></p> <p><i>To connect work on angles, fractions and percentages to the interpretation of pie charts.</i></p> <p>To interpret and construct pie charts and line graphs (relating to two variables) and use these to solve problems.</p>
------------------------------------	--	--	--	--	--	--	--

'Being different, Belonging together'

Solve problems				To solve one-step and two-step questions using information presented in scaled bar charts and pictograms and tables.	To solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.	To solve comparison, sum and difference problems using information presented in a line graph.	<i>To know when it is appropriate to find the mean of a data set.</i>  To calculate and interpret the mean as an average.
----------------	--	--	--	--	--	---	---

**RATIO AND PROPORTION**

'Being different, Belonging together'

Ratio and proportion							<p>To recognise proportionality in contexts when the relations between quantities are in the same ratio, e.g. recipes.</p> <p>To solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts.</p> <p>To solve problems involving the calculation of percentages and the use of percentages for comparison <i>including linking percentages or 360° to calculating angles of pie chart.</i></p> <p>To solve problems involving similar shapes where the scale factor is known or can be found. To solve problems involving unequal quantities, sharing and grouping using knowledge of fractions and multiples.</p>
----------------------	--	--	--	--	--	--	---

Our Values	IMPACT			
<p>Honesty: We believe that honesty is the foundation for trust in our relationships. We are brave and admit when we have made a mistake. We are reliable and responsible for our own actions.</p>	<p>WHOLE CURRICULUM</p>	<p>Children will make progress and be able to show that they have learnt more and remember more across the curriculum areas.</p>	<p>MATHEMATICS CURRICULUM</p>	<p>At Frances Olive Anderson, we aim for our pupils to enjoy and be happy in their Mathematics lesson, where they feel secure and confident to ‘have a go’ and believe they can achieve. Through teacher questioning, increased thinking time and partner/group discussions, we allow our pupils to fully articulate a reasoned mathematical argument, putting more emphasis on the journey to finding the answer(s) rather than simply being right or wrong.</p> <p>During a Mathematics lesson, our pupils are fantastic ‘coaches’ to one another. They can support each other with their learning, through various Kagan approaches. When children can recall, explain, and ‘teach’ their learning to another pupil, it begins to demonstrate the mathematical concept or skill being <i>mastered</i>. A mathematical concept or skill has been mastered when a child can show it in multiple ways, using the mathematical language to explain their ideas, and can independently apply the concept to new problems in unfamiliar situations.</p> <p>Pupils are confident moving between different contexts and representations of mathematics and use the same concrete resources for representations no matter their year group. They are becoming more able to recognise relationships and make connections in Mathematics, particularly through activities such as paired ‘Maths Talk’ work. We hope our Maths curriculum prepares children for their future in and out of education, and gain an understanding of its importance in everyday life.</p>
<p>Courage: We are brave and take chances. We develop resilience to keep going even when things are hard. We face our fears and we are not afraid to learn from our mistakes.</p>		<p>Children learn what is intended for them to learn from the curriculum aims and objectives.</p>		
<p>Friendship: We value our friendships and believe that together we can support one another to flourish. We do not judge we accept everyone for who they are.</p>		<p>All learning builds towards an end point.</p>		
<p>Respect: We are respectful by treating others how we wish to be treated—we use our manners, we are thoughtful, kind and celebrate our similarities and differences.</p>		<p>Pupils are ready for the next stage of learning, within the subject areas and from year to year and key stage to key stage.</p>		
<p>Commitment to achieve: We believe we can achieve in anything that we put our minds to. We always aim high, display a thirst for learning; to be the best we can be.</p>		<p>All pupils acquire the knowledge and cultural capital they need to succeed in life.</p>		
		<p>Some impact will be evidenced by national tests and the school keeps internal records of achievement for tracking and target setting purposes in all year groups.</p>
